

Harshad Bhanushali

AI AUTOMATION ENGINEER

Hi! I'm **AI (Automation) Engineer** with a strong foundation in **Artificial Intelligence and Machine Learning**, specializing in designing and implementing **automated workflows** that reduce manual effort and improve **operational efficiency**. Skilled at identifying repetitive processes and building **intelligent, self-sustaining systems** that run seamlessly with minimal oversight.

EXPERIENCE

Business Automation Intern/ Crystal Solutions

Jan 2026 -July 2026 / On-site

Automated business workflows by developing **websites**, integrating **AI chatbots**, setting up **WhatsApp integration and automation**, running **LinkedIn automation**, and creating **AI-driven content and marketing campaigns**.

Intern / PentaFox

Nov 2024 -Mar 2025 / On-site

Worked on developing and maintaining **Python based solutions**, applying strong **logical and analytical thinking** to solve complex problems. Focused on **writing clean, efficient code, debugging issues**, and **building structured, scalable logic for core application features**.

PROJECTS

InvoFlow

Smart Invoice Automation Workflow

Built a **full-stack invoice automation system** using **Flask** (backend) and **React.js** (frontend), with **PaddleOCR-based AI extraction** to automatically capture, validate, and process invoice data , eliminating manual entry and reducing errors.

Used **Python, Flask, SQLAlchemy**, and **SQLite** for backend/data handling; **JWT and CORS** for security; and **Twilio** with **email automation** for real-time notifications ,enabling a seamless, **automated invoice-to-approval workflow**.

Cortex Flow

CRM and AI-powered calling platform

Contributed to a **SaaS platform** enabling businesses to **manage leads, contacts**, and **outbound calls via AI-driven calling**. Worked on **frontend development, database and API integration**, and **AI calling workflows**, gaining hands-on experience in **modern web development and cloud deployment**.

Used **Next.js, React**, and **TypeScript** for frontend development, styled with **Tailwind CSS**; **Supabase** and **PostgreSQL** for database management; **OpenAI API, LiveKit, Deepgram**, and **Telnyx** for **AI-driven calling and voice integration**; and **Google Cloud, Vercel**, and **GitHub Actions** for cloud deployment and **CI/CD**.

Business Automation

WhatsApp Automation & LinkedIn Automation

Built automated workflows for **WhatsApp** and **LinkedIn** using **n8n** as the **core automation engine**, enabling seamless **messaging, outreach, and engagement** without manual intervention. Integrated **WhatsApp Business API** and **LinkedIn API** via **API keys** to **trigger messages, automate responses, schedule posts**, and **manage outreach**, with **webhook-based triggers** enabling **real-time workflow execution**.

EDUCATION

Undergraduate

B.Sc in Artifical Intelligence and Machine learning

TISS Mumbai| 2023-2026

SKILLS

Problem-Solving
Client Communication
Workflow Design & Process Optimization
Analytical Thinking
Attention to Detail
Time Management
Adaptability
Team Collaboration
Critical Thinking
Project Management
Client Requirement Analysis
Self-Learning / Quick Learner
